

MONTY TECH VETERINARY CLINIC

What Services do we Provide?

The Monty Tech Veterinary Clinic provides high-quality, subsidized veterinary care within our community ensuring all families have access to valuable preventative and primary care opportunities. Our services include:

- Routine wellness and preventative care visits
- Affordable medications, vaccinations, and preventatives such as flea, tick, and heartworm prevention
- Limited diagnostic services such as lab work, radiographs, and cytology
- Dentistry and primary care surgical services on a limited basis (see below for more information)
- Compassionate end of life care

What to Expect

We are a teaching school operating out of the Montachusett Regional Vocational Technical High School. Visitors will interact with high school students interested in becoming future veterinary professionals. Our licensed veterinarian, Dr. Harackiewicz, oversees all of the care your pet receives.

Clients should expect their appointment times to be longer than those with a traditional clinic as our students are learning. Our primary focus is on high school students and their education in Veterinary Assisting/Veterinary Science. We thank you in advance for your patience and kindness.

Contact Information

We are located within the Montachusett Regional Vocational Technical High School campus, but not within the school itself. Our clinic address is **218 State Road East, Westminster, MA**. You can find us in front of the football and track fields with our own parking lot.

Phone: (978) 516-0888
